

NOTICE TO CUSTOMERS:

BOIL WATER ADVISORY

The Cazadero Water Company sources its water from springs and shallow wells, which are regulated by the State of California Division of Drinking Water (DDW) as surface water. The State has issued a boil water notice because the current system lacks the proper filtration required to ensure the water's safety.

This advisory will remain in effect until the water is properly treated and is in compliance with State standards. To meet these requirements, a Surface Water Treatment Plant must be constructed.

We are actively working with our partners to design, fund, and implement a long-term solution. We understand the inconvenience this may cause and deeply appreciate your patience and cooperation as we work to resolve this important public health matter.

If you have questions or need additional information, please contact Russian River Utility or contact DDW.

Thank you, Cazadero Water Company
